## Unit Basic Needs Review

<b>nutrients</b>	<b>basic needs</b>	<b>Habitats</b>	<b>diversity</b>
<b>environment</b>	<b>shelter</b>	<b>survive</b>	

**Directions:** Use the words from the box above to complete the sentences below. Remember to choose the BEST answer. Some sentences are multiple choice, so circle the BEST choice for those sentences.

Plants get \_\_\_\_\_ from the soil. Plants need air to survive just like a (a. car, b. pig, c. key) does. Plants also need water just like a (a. seed, b. computer, c. rock). Ducks get (water, air, candy, its own room) from a pond (think directly from the pond).

All living things have needs that must be met in order to survive called \_\_\_\_\_. \_\_\_\_\_ means to stay alive. Not all things have basic needs, a (a. a turtle, b. a rose, c. a scissors) does not have basic needs. \_\_\_\_\_ meet the needs of all living things in them. Your habitat provides you a safe place to live called a \_\_\_\_\_.

We need to protect rainforests because there are many different types of plants and animals that live there. The rainforest is filled with lots of \_\_\_\_\_.

All living and nonliving things in a place is called an \_\_\_\_\_. A polar bear eats seals, fish and penguins. It has thick fur to protect it from extreme cold weather and water. Which environment would best meet a polar bears basic needs (a. desert, b. forest, c. the arctic, d. the sky).

Lee observes a snake at the zoo. What is something Lee would NOT be able to observe about the snake (a. it slithers, b. it is green, c. snakes are important for eating rodents, d. the snake is about two feet long).
